

Enterprise

maintaining the infrastructure of the UK

June 2011

To whom it may concern

GM decorating has been working with Enterprise on the Family Mosaic Decent Homes programme from autumn 2010 until July 2011. The GM decorating team lead by Liam and Jacqui have shown strong commitment and enthusiasm in delivering their allocated work elements within the works programme. They have worked tirelessly and unselfishly to improve and bring strong service delivery into their work ethos and have strived to deliver maximum customer satisfaction in often challenging geographical circumstances.

The team's dedication to always help and to answer any queries and to deliver the best results, has been at the forefront to their service delivery and has improved all the time.

The quality of work is now at the stage where it is regularly recommended by residents and the client. GM have no issues in delivering kitchens, bathrooms, rewires and heating works to any social housing environment with their dependable and experienced site team.

I wish them all the best on future projects and would recommend them carrying out these works based on the work and relationship that has been developed with us over the last 10 months.

Yours Sincerely

Andrew O`Grady
