**REFERENCE FOR G M DECORATING LTD**

I am pleased to provide my personal opinions in regards to the experiences of working with GM Decorating Ltd.

Over many years of engaging this company to deliver projects ranging from common area redecoration and repairs, replacement kitchens and bathrooms as part of decent home improvement programmes including rewiring and boiler renewal, I have not had any reason for dissatisfaction. These projects have ranged from £20k to over £2m.

The approach of their personnel is one of friendliness, approachable, knowledgeable and collaborative to solving problems. They endeavour and achieve to know the client's requirements in detail and ensure these are translated into on site operations.

Delivery of works have been impressive with high quality, good performance, competitive prices and high safety being achieved frequently. GM Decorating have access to multiple resources making them ideal for multi discipline projects when you require single point of management.

They are a company that work in partnership to mobilise and deliver work programmes whilst client briefs maybe still developing or the project is complex and requires a design and build work ethic.

GM Decorating have proven to be a reputable company that I have no hesitation in working with on future commissions.

Yours sincerely

Rob Wood  
Head of Repairs & Maintenance
