

Asbestos Materials Policy

In accordance with the Control of Asbestos at Work Regulations 2006:

1. Exposure to asbestos dust may lead to lung cancer, asbestosis, or mesothelioma.
2. Material containing asbestos may be found in buildings where demolition, maintenance or refurbishment work is being carried out.
3. Asbestos Awareness training is given when deemed appropriate.
4. Where the presence of any asbestos type is suspected, its removal must not be attempted.
5. Operatives must immediately cease work and notify the Site Manager.
6. The Site Manager must immediately notify the Contract Manager and the Managing Director of GM Decorating Ltd.
7. It is the responsibility of the Client to appoint an HSE licensed specialist contractor to remove the asbestos.
8. The operatives will not return to continue works until the area has been deemed safe and appropriate certificate of confirmation produced.
